DownSea Sunglasses Are New For Flying Fisherman's 2017 Master Angler Series

Islamorada, Florida Keys – New for 2017, the Flying Fisherman **DownSea** offers anglers an edge with a large fit, lightweight TR90 frame featuring co-injected non-slip nose and temple pads for a stay-put fit. Virtually indestructible, polycarbonate RhinoLenses™ offers anglers shatterproof eye protection from flying hooks, lures, sinkers and more, plus the Flying Fisherman® AcuTint™ lens coloring system for enhanced optical clarity and 100% UV protection. Available this October, **DownSea** frame colors are Matte Black with smoke, blue mirror, or vermilion lenses and Matte Bronze with amber-gold mirror lenses. Superior performance for serious anglers! MSRP is an affordable \$79.95 including a microfiber, drawstring case and one year warranty.

The Flying Fisherman® Polarized, AcuTint™ lens coloring system eliminates glare and enhances color contrast, without distorting natural colors. The enhanced visual sharpness and comfort adds to fishing productivity, and maximizes the overall outdoors experience for anglers and water sports enthusiasts who need to see below the water's surface to spot fish and other structure. For more information on Flying Fisherman® eyewear and accessories, along with testimonials, a dealer locator and more, go to www.flyingfisherman.com or call 305-852-8989 for a catalog.
